

RELEASE TRIGGER STICKER PLACEMENT INSTRUCTIONS

SAFETY FIRST!

Place the sticker on at least one of these two locations: the underside of the barrel just in front of the forearm or on the grip cap (pictured left).

This sticker needs to be visible when the gun is in a gun rack so that your release trigger gun is not picked up by accident by a person who is not familiar with release triggers.

These are available from NSSA-NSCA Headquarters. Please call or write to Membership Services (see below).
